

April 1<sup>st</sup>, 2010

Dear EU Supplier or Customer,

Röchling Glastic Composites is fully committed to complying with all federal and international standards for occupational and environmental safety.

In the European Chemicals Agency (ECHA) "Guidance on Requirements for Substances in Articles" (May 2008), Röchling Glastic Composites' products are clearly defined as "articles". Therefore, we are not bound to register our products under the current REACH regulations. We are similarly released from registration because our products are polymers, which are currently exempt from REACH regulations.

Because we do use monomers in our products, we have confirmed that our monomer suppliers have fulfilled all of their REACH registration requirements.

RGC does not use any SVHC (Substances of Very High Concern) in our products, as defined by ECHA in their listing of 3/30/10. We will continue to monitor any changes to this list and take appropriate action depending on the relevance of the substance.

Please feel free to contact RGC if you have any questions.

Sincerely,

Sean G. Madden  
REACH Coordinator  
Röchling Glastic Composites
